

The app for bone anchored patients

Ponto Care app

Digital Health is becoming increasingly relevant during these social distancing times. Check out the free Ponto Care app – the go-to app for bone anchored patients.

The Trial section of the app supports patients in making the most out of their trial, by guiding them through different listening situations and enabling them to send a Report with their observations to their audiologist. In the aftercare part, patients can check their implant site with the “smart camera” feature and keep track of their hearing on a Digital Diary.

Feel free to get in touch if you think you can use the app in your practice - or if you have comments or questions about this solution.
