

MED^{EL}

One Size Does Not Fit All

Our new anatomy-based fitting tools allow you to easily fine-tune the frequency map to be closer to the natural map for each individual cochlea.

By combining detailed imaging data from OTOPLAN* with MAESTRO 9.0, you can quickly assign center frequencies based on the actual anatomical location of each electrode contact.** And that's only the beginning.

Get exclusive insights into the next era in cochlear implant technology.
